The historical church has been guilty of excluding people because they are gay. More and more churches are showing support for the LGBT community as we recognize Biblical insights that recognize the fullness of God's love and support for LGBT persons. Come to this workshop and discover how reading snippets of Scripture out of context have led to false and misleading interpretations of the Bible's message for gay people. Come and discover both Biblical and theological reasons for why there's nothing wrong or sinful with being gay. Come and learn how a careful reading of the whole Scripture reveals God's good news about love, marriage, and sexuality for gay and straight people alike.
